## PROFILE

Results-driven software engineering professional with expertise in project management and leading cross-functional teams. Skilled in agile methodologies and scrum practices, with a strong foundation in computer engineering. Committed to optimizing operations, ensuring compliance, and exceeding performance targets. Seeking to leverage technical expertise and leadership abilities to drive innovation and achieve exceptional outcomes in the tech industry.

## SKILLS

JavaScript (OOP, ES6+), HTML, CSS, SASS, TypeScript, AWS, S3, Node.js, React, Express.js, JSX, MySQL, MongoDB, Postman, Git, GitHub, Figma, Jira, MCSA, Power BI, Debugging, Problem-Solving, Agile Methodologies, Scrum Practices, Security and Privacy Strategies, End-to-End Project Execution, Cross-Functional Team Leadership, Scalability, and Performance Optimization

## EDUCATION

**Software Engineering Diploma,**  
**BrainStation**

**MBA,**  
**Khalaghan Business School**

**Computer Engineering BSc,**  
**Ferdowsi University**

## EXPERIENCE

### Freelance Full Stack Developer

Dec 2023 – Present, Toronto

- Developed web apps using TypeScript, React, Node.js, and AWS S3 for enhanced data management.
- Deployed client solutions on Heroku and Netlify for reliable performance.
- Crafted RESTful APIs with Express.js for efficient system integration.
- Optimized MySQL and MongoDB databases for improved performance.
- Managed Git version control, enhancing further reviews and code quality.

### Software Engineering TA | BrainStation

Aug 2023 – Dec 2023, Toronto

- Chosen for the role due to outstanding performance within the cohort.
- Applied my expertise in JavaScript, HTML, CSS, React, and Node.js to guide and teach a cohort of 34 students.
- Provided in-depth debugging and code review, particularly in React and Node.js, enhancing student learning and project outcomes.
- Boosted students' Git skills and web app development capabilities with focused training in RESTful API integration and MySQL.

### Operations Manager | Snapp (The biggest tech company in Middle East)

Aug 2017 – Jan 2024, Middle East (Remote)

- Drove a 10X business growth by leading 350+ employees, focusing on strategic planning and market expansion.
- Implemented an agile organizational structure, overseeing hiring and ensuring performance alignment with tech industry standards.
- Spearheaded IT strategy, aligning technology solutions with extensive service offerings and business goals.

### Co-Founder, Engineer | SaamTech

Jan 2013 - Aug 2016, Iran

- Led the design and implementation of BMS and environmental control systems, integrating software with hardware and IoT technologies for diverse applications.
- Engineered innovative IR touch panel technology and custom control units, including PCB design and microcontroller programming.
- Directed the lifecycle of complex technology projects, including the 'Sverker' electrical power equipment testing system.
- Crafted hardware and software solutions to meet specific client needs.

## PROJECTS

### Sole Full Stack Developer | [TheBOX!](#)

Sep 2023

- Conceptualized and developed a full-stack social networking/educational app, using JavaScript, React.js, Node.js and Axios for efficient API communications.
- Integrated real-time chat (Socket.io), user auth (JWT, Passport.js).
- Crafted a responsive and interactive UI with SASS, and TailwindCSS.
- Managed API server with Express.js and MySQL as DBMS.

### Full Stack & Lead Developer | [InStock](#)

Aug 2023

- Led InStock inventory management system using React, Node, Express, and MySQL, leveraging Agile and Scrum for project management.
- Enhanced team collaboration and code quality with pair programming, daily stand-ups, and Git; designed UI with Figma and deployed via Heroku and Netlify.
- Achieved seamless frontend and backend integration with clean code and Axios for optimized API interactions and user experience.
